Your valuation has been performed in accordance with New Zealand and International Valuation standards, conducted with best valuation practice methods and standard gemmological equipment.

The information recorded on this valuation represents our interpretation of results obtained from gemmological instruments and grading techniques designed for this purpose. Using an Insurance Valuation for re-sale purposes or in advertising for re-sale purposes may contravene the Fair Trading Act.

Any modifications applied to the original item including but not limited to metal structure and composition alteration, diamond and gemstone (shape, cut, color, clarity, size, hue, saturation, etc.) replacement or alteration will void this Valuation.

Due to the subjective nature of gemmological appraisals, results may vary considerably between Valuers. We have made this valuation to the best of our knowledge and ability, but can assume no liability for same, unless attributable to gross negligence, fraud or willful misconduct.

Limitations

Unless otherwise stated, all gemstone identifications, estimated carat weights, measurements and grades are assessed in their settings using industry standard methodology.

Actual weights and/or grades apply to diamonds and coloured gemstones that have been presented with a certificate or with details from the supplier. Any certificates or documentation withheld from the valuer at the time of the valuation may render this valuation invalid.

All precious metals are tested by acid and/or electronically and will this be stated on your valuation. The overall condition of each item has been checked and considered satisfactory unless otherwise stated.

It is common practice for gemstones to be subjected to acceptable treatment(s) to improve their colour and/or durability. Detection of certain treatments require advanced Gemmological testing equipment which is beyond the scope of this valuation.
